

Welding Curtains

Protection from UV and IR Radiations

Red

Dark Green

ESAB Welding Curtains

Welding Curtains provide protection in the shopfloor from harmful UV & IR radiation. Unprotected exposure to welding arc rays could cause arc eye (short-term exposure), cataract (prolonged exposure) and skin burn.

ESAB's self-extinguishing welding curtains provide protection from fire hazards in addition to harmful radiation.

- Superior Self-extinguishing PVC material
- Stitch Seams for longer life
- Reinforced eyelets
- Press studs for large area coverage
- Conforms to EN ISO 25980:2015-01
