

SAFELUX PLUS

CEILING FLUSH ROOFTOP DAYLIGHTING SYSTEM

THE ESSENCE OF PURE
SUNLIGHT MINUS
ELECTRICITY

FEATURES OF SAFELUX PLUS

An innovative system to harness sunlight and guide it indoors - otherwise impossible with windows or skylights.

High reflective sheet that reflects 98% of all visible light. Ensures lesser variation in light intensity.

Low heat transfers.
Lowers cooling requirements

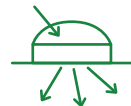

Termination of light tube at roof makes it suitable for low heights

Natural sunlight allows colors to be seen as they are

Leak proof installations

Light dispersal over a wide angle by by a prismatic diffuser

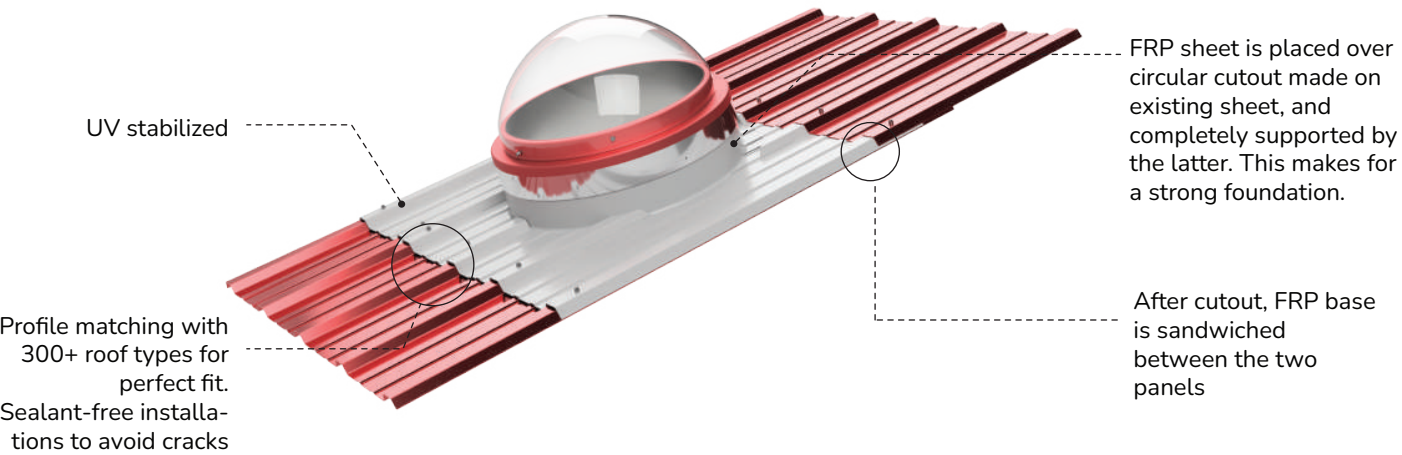

Compatible to more than 300+ roof types and slopes including RCC roof

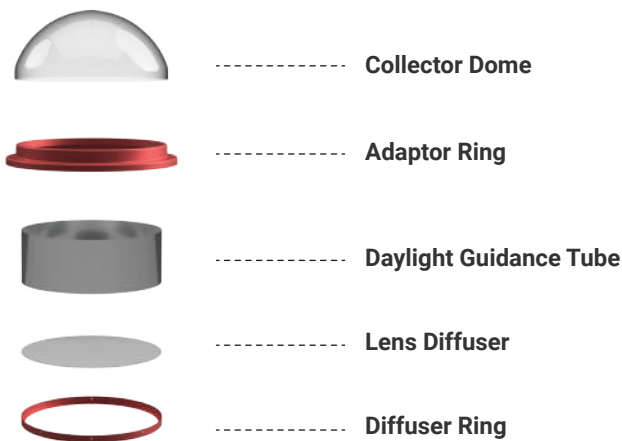

- Widest range, largest sizes
- Zero failure & no maintenance products
- India's largest ventilator manufacturer, installer, and exporter
- More than 70% returning customers

INSTALLATION PROCESS

Guaranteed leak-proof installation and operation of all SVS products.
We use a short length base-sheet to ensure safety of the worker during and after installation.

EXPLODED VIEW OF SAFELUX PLUS

- **Collect**
The transparent dome captures sunlight throughout the day into the tube
- **Transmit**
The tube's specular film (Reflectivity > 98%) transmits the light downwards without any colour change
- **Diffuse**
The prismatic diffusers light evenly into the room and reduces glare.

Tube diameter [mm]	Tube length [mm]	Coverage area [ft ²]*
500	250	400
750	250	800
